The ISA2.5 Gateway Router offers superior Home / Office Class Router, Firewall, & VPN connection services. The ISA2.5 Internet Security Appliance is a user-friendly, Home and Small Office Class Firewall, and VPN appliance for up to 10 users with no public facing servers. It is perfectly suited for telecommuters and small offices that require secure high-speed access to remote network resources.

The ISA2.5 inherits the product lines successful robust ICSA-certified, Stateful Packet Inspection Firewall with integrated IPSec and advanced security features. The ISA2.5 can provide secure IPSec connectivity to corporate headquarters or other branch office locations, and is compatible with most any manufacturer's IPSec VPN gateway.

Benefits:

Virtual Private Network (VPN) Connection

The ISA2.5 supports two IPSec VPN suitable for remote site to central server deployment and home to office or office to home deployments. Data encryption over the Internet helps ensure secure transmission between the two sites eliminating the need for expensive leased lines, and enabling global interconnectivity at a minimal expense.

Secured Firewall Protection and Blue Coat Internet Content Filtering

The ICSA Labs certified firewall if the ISA2.5 provides robust firewall protection, based on Stateful Packet Inspection (SPI) and Denial of Service (DoS) technology. The ISA2.5 helps provide perimeter defense against hackers, and other malicious threats. Optional Blue Coat subscription services can assist in keeping spyware, malware, and phishing exploits from attacking your PCs, and help protect business and family from illegal and unwanted surfing.

Broadband Internet Access Sharing

The ISA2.5 increases reliability in support equipped with a built in four-port 10/100 Ethernet switch with DMZ support, allowing multiple users to share one broadband Internet Connection. Features standard SUA and Full Featured NAT modes.
